

Bug ID	B001
Test Case ID	TC007
Description	Cart does not support quantity adjustment for same product
Steps to Reproduce	1. Login to SauceDemo using valid credentials 2. Navigate to product list 3. Click “Add to Cart” multiple times for the same product 4. Go to “Your Cart” page 5. Observe product quantity behavior
Expected Result	Application behavior for adding the same product multiple times should be clearly defined. The cart should either: • increment product quantity, • prevent duplicate additions with a clear message, • visually indicate how repeated “Add to Cart” actions are handled
Actual Result	• Only a single quantity is reflected per product • No visible option to adjust quantity in cart or product page • Clicking “Add to Cart” does not clearly reflect multiple quantity increase behavior
Screenshots	 The screenshot displays the 'Products' page of the Sauce Labs application. It features a grid of product cards, each with an image, a title, a brief description, a price, and an 'Add to cart' button. The products shown include a 'Sauce Labs Backpack' (\$29.99), a 'Sauce Labs Bolt T-Shirt' (\$15.99), a 'Sauce Labs Onyx' (\$7.99), a 'Sauce Labs Bike Light' (\$9.99), a 'Sauce Labs Fleece Jacket' (\$49.99), and a 'Test, allTheThings() T-Shirt (Red)' (\$15.99). The page layout is clean and modern, with a white background and a dark header.

	
Status	Open
Notes	This may be a design limitation where the application uses a toggle-based cart (add/remove instead of quantity control). However, from a user experience perspective, a quantity adjustment feature in cart is typically expected in e-commerce flows.

Bug ID	B002
Test Case ID	TC008
Description	User is able to proceed to checkout even with empty cart
Steps to Reproduce	1. Login to SauceDemo 2. Ensure cart is empty (no products added) 3. Go to cart page 4. Click "Checkout" 5. Fill in required personal information 6. Click "Continue" then "Finish"
Expected Result	Application should prevent checkout when cart is empty or display validation message indicating no items are available for purchase.
Actual Result	• Application allows checkout process to continue even with empty cart • User is still prompted to enter personal information • Order confirmation is displayed with \$0.00 total • Application completes an order transaction despite having no items in the cart
